- ◆ **Uses 9V batteries**
- ◆ **Choice of frequencies**
- ◆ **User selectable power output**
- ◆ **Extended Life version available (12 months)**

The **ULB-364** Series Underwater Locator Beacon is a cost-effective acoustic relocation pinger designed for rigorous offshore use. Using off-the-shelf 9V alkaline or lithium batteries, the ULB-364 is ideal for marking underwater sites or equipment where cost is a factor.

Flexibility is a key factor in the design of the ULB-364 series beacon. The ULB-364 can be ordered to meet

unique needs with options for different frequencies, acoustic outputs and different activation methods.

The **ULB-364EL** Extended Life Beacon is the right choice when deployment lengths are longer than 6 months. A longer housing which holds four additional 9 volt batteries extends the operational life of the ULB-364EL to 12 months.
