

ULB-364 EL Underwater Locator Beacon

- ◆ **Designed for rigorous offshore use**
- ◆ **Uses 9V batteries**
- ◆ **User selectable frequencies**

The RJE International **ULB-364EL** Underwater Locator Beacon is an underwater acoustic signaling device used in subsea marking and relocation of equipment and other assets. The ULB-364EL is a free running pinger that allows the user to adjust the frequency and repetition rate of the pulse.

The ULB-364EL is a small battery operated pinger used to mark and relocate targets underwater in water depths to 1,000m. The lightweight aluminum housing of the ULB-364 EL allows for easy deployment, and once deployed will operate for 540 days based on the settings and batteries used.
