The **ASR-370 Acoustic** Recall Device is a rugged and reliable subsea acoustic device used for signaling marine mammals like dolphins or sea lions.

Water-switch activated, the ASR-370 sends a 12kHz acoustic signal by dipping the end of the device in the water.

Battery operated, the ASR-370 can continuously send an acoustic signal for up to 18 days. Built for the harsh conditions of the marine environment, the ASR-370 is ideal for your training program.
