- ◆ **Designed for inflatables**
- ◆ **Easy to read compass**
- ◆ **Adjustable chem-light**
- ◆ **Used by military forces worldwide**

The **BNC-100** Series Boat Navigation Console ensure accurate navigation of small inflatables in tactical combat situations when accuracy is essential. Used by Special Boat Commands worldwide, the console is designed for easy installation on the air compartment of small inflatables like the Zodiac F470. Mounting slots allow for reliable tie-down points utilizing tiewraps, 550 cord, or bungee straps. The BNC-100 consists of a knot-meter and navigation compass mounted on a high-impact plastic board with adjustable chem-light holder and instrument hood.

The navigation compass uses a black compass card with luminous markings to facilitate night navigation. Accuracy, in rough seas is ensured by a jeweled bezel movement in the compass. The knot-meter has a large, easy-to-read face with a dial range of 0-30 knots. The in-water transmitter for the knot has no moving parts and uses a Pitot tube type design to measure speed. The transmitter can also be raised and lowered by hand to avoid damage when beaching the boat. The BNC-100 comes complete in an easy to store carrying bag.

BNC-100 Knotmeter w/ BNC-100-2-1 Speed Transmitter Kit (sold separately)
