# POPS

- Polar Ocean Profiling System
- Bi-directional communication
- Innovative and robust design
- Instrumentation packages available

**METOCEAN SYSTEMS** 

The Polar Ocean Profiling Systems (POPS) is a rugged ice platform, which provides meteorological and oceanographic data via Iridium®. The system consists of six major elements—System Controller, Compact Flash Data Logger, Meteorological Sensors, Data Telemetry and Global Positioning System and a Subsurface CTD Vertical Profiling System.

The hull is constructed of aluminum with an lonomer foam collar for floatation. The tubular hull is intended to be placed into a hole drilled in the ice, which provides excellent stability. The design is compact and light to allow for simple deployment.

# **TECHNICAL SPECIFICATIONS**

## **PHYSICAL**

- Hull Diameter: 8.625" (220 mm)
- Floatation Collar: 24" (610 mm) x 7.25" (180 mm)
- Height: 78.7" (200 cm)
- Mass (in air): 34 kg (75 lbs)

### CONSTRUCTION

- · Surface Unit: Aluminum
- · Collar: Extruded ionomer foam
- Mast: Aluminum

### **SENSORS**

- Barometric Pressure: Vaisala PTB100
- Air Temperature: YSI 44032
- Sea Surface Temperature: YSI 44032
- Profiler: Provor CTS-3 and inductive link

### **ELECTRONICS**

- Iridium telemetry: Iridium SBD 9522A LBT modem
- GPS: Conexant Jupiter Model TU 35-D410-031
- PTT: METOCEAN Model MAT 906

# **POWER SUPPLY**

- Battery: 75 D-cell (SAFT LS 33600)
- Chemistry: Lithium thionyl chloride
